EXECUTIVE SUMMARY

Motivated BCA student with a strong foundation in programming (Python, C) and hands-on experience building small applications and tools. Passionate about IT operations and software development, with keen interest in debugging issues and improving system reliability, well aligned with the responsibilities of this IT Intern role. Quick learner who enjoys exploring new technologies, documenting clear troubleshooting steps, and collaborating with teams to deliver practical solutions. Strong problem-solving, communication, and documentation skills developed through academic projects

EXPERIENCE

COGNIFYZ, DATA ANALYSIS INTERN (02/2026 – 03/2026)

- Built Predictive Models: Developed and optimized Random Forest and Decision Tree models using Python (Pandas) to predict restaurant ratings, achieving high accuracy through comparative performance analysis.
- Extracted Data Insights: Conducted advanced EDA and feature engineering using Matplotlib and Seaborn to identify key drivers of customer satisfaction and geospatial restaurant trends.

CODTECH IT SOLUTIONS, INTERNET OF THINGS INTERN (06/2025 – 07/2025)

- Developed a Smart Lighting Control System using HTML, JavaScript, and Firebase to enable real-time remote control and automation of lighting.

EDUCATION

JAIN UNIVERSITY, BACHELOR OF COMPUTER APPLICATIONS (2024 – 2027)

- CGPA: 7.59

SRINIVASA VIDHYALAYA, HIGHER SECONDARY EDUCATION

- SCORE: 90.3 %

SKILLS

Programming in C and Python

JAVA

Structured Query Language (SQL)

IT systems and networking

Debugging & Troubleshooting

Problem-solving expertise

Strong Communication & Team Collaboration

PROJECTS

Restaurant Data Analysis & Prediction

- A machine learning project that uses regression algorithms and EDA to analyze restaurant trends and predict aggregate ratings.

E-Commerce Sales Analysis Dashboard

- A Power BI dashboard that visualizes and analyzes e-commerce sales data and trends.

Smart Light Control System

- Developed a Smart Lighting Control System using HTML, JavaScript, and Firebase to enable real-time remote control and automation of lighting.
